

Key for IPM 2017 Modeling Annual CO2 Credit Price, CO2 Emissions and CO2 Allowance Auction Revenues

Scenario	Explanation	Case	Explanation
Reference Case	RGGI Cap Held Constant post 2020	NP	Modeling includes a national program
		NP Hi	Modeling includes a national program with high sensitivities
		No NP	Modeling does not include a national program
		No NP Hi	Modeling does not include a national program with high sensitivities
		NP Low	Modeling includes a national program with low sensitivities
Policy Scenario 1	Cap declines 2.5% from 2021 to 2030	NP	Modeling includes a national program
		NP Hi	Modeling includes a national program with high sensitivities
		No NP	Modeling does not include a national program
		No NP Low	Modeling does not include a national program with low sensitivities
Policy Scenario 2	Cap declines 3.5% from 2021 to 2030	NP	Modeling includes a national program
		NP Hi	Modeling includes a national program with high sensitivities
		No NP	Modeling does not include a national program
		No NP Low	Modeling does not include a national program with low sensitivities
Policy Scenario 3	6.52% cap reduction in 2019 & Cap	NP	Modeling includes a national program
